UPGRADING THE FISHERY SECTOR IN SOUTH SUDAN

**SUPPLY OF WOODEN STOOLS FOR THE KONYOKONYO – JUBA AND
NIMULE MARKET STALLS, SOUTH SUDAN**

1. Background

The vast and highly productive Nile River ecosystem in the Republic of South Sudan (RSS) harbours a significant, but unknown, amount of fish and supports a simple fisheries value chain that has the potential to create employment and positively impact food security in South Sudan.

An inland artisanal fishery exists around lakes, rivers and floodplains with fisher folk mainly using traditional fishing methods that limit their ecological impact. Much of these fisheries are seasonal with fisher folk dividing their time and labour between fishing, crop farming and livestock. These fisher folk and their fishing communities are amongst the most poor and least resilient social group to livelihood shocks and make up a significant part of the severely food insecure households in the country.

This project addresses fishing communities and actors along the entire fisheries value chain, improving food security (in rural households, in particular), creating jobs and the establishment of alternative income generating activities as means to support small-scale business development and women empowerment in South Sudan.

The establishment of fishery sector infrastructure at KonyoKonyo market and Nimule market in South Sudan, supports the Government in its development plans. The fish markets will help reduce post-harvest losses and help ensure that fishery sector workers can sell an improved product and that consumers have access to safe food. The recently constructed markets will provide a proper facility to expand the fish trade and cater to the needs of the market workers and the consumers. The markets provide more space for each market stall, a location to store fish overnight (fresh and processed), administrative rooms and toilet facilities, as well as a borehole and generator for operations.

It is expected that the operation of the fish market will change how fish is sold and bought in South Sudan, introducing more nutritious food sources to consumers and increasing revenues for people in the fishery sector.

2. OBJECTIVE OF THE CONTRACT

The objective of this contract is to build and supply 250 wooden stools for market stalls for traders in the two newly constructed markets in Konyo Konyo – Juba and Nimule, South Sudan.

3. SCOPE OF SERVICES TO BE PROVIDED

The supply of 250 wooden stools for stalls listed in the annexed bill of quantities (BOQ) and technical specification. Please see table for technical specifications and drawings. Provision of all inputs and building of wooden stools as per technical specifications. The wooden stools must have a water resistant finishing oil paint.

Stools are specific to each stall and must be made accordingly. Therefore works on-site are required.

4. PROPOSAL FORMULATION AND COST BREAKDOWN

4.1 Language of the proposal

Please use the attached template and submit a hard copy of the offer/quotation to:

Attn: Victor Cobby Baah
UNIDO Fisheries Project
Project Office
UNDP Compound, Ministries Road
Juba – South Sudan

4.2 Submission date

No offers/quotations will be accepted after 17:00 Juba local time on Friday, 18 August 2017.

5. TECHNICAL EVALUATION CRITERIA

The following criteria will be applied for evaluating the proposals:

- Legally authorised to undertake such work in South Sudan.
- Experience with small-scale construction activities.
- Understanding of scope of activities.

6. LIST OF ANNEXES

- Annex I – Bill of quantities
- Annex II - Technical drawings of wooden stool for stalls.

Annex I – Bill of Quantities (BOQ).

Bill of quantity for 250 stools at KonyoKonyo and Nimule fish market					
S/N	DESCRIPTION	UNIT	Quantity	Rate USD	Amount USD
A	HARD WOOD (TIMBERS)				
1-	3X2 (4 meters)	MI	462		
2-	1x12	ML	21		
3-	ply wood (2.4x1.2)	m2	9		
	Summary of hard wood works				
B	FINISHING MATERIALS				
4-	Nails	KGs	250		
5-	Glue	KGs	250		
6-	Paints	KGs	117		
7-	Filter	KGs	1000		
8-	Sand Paper	PCs	235		
9-	Machine Works	PCs	235		
10-	Water and insect resistant coating	Ltrs	40		
	Summary of finishing works				
	Total general summary				
	Grand total summary				

Annex II - Technical drawings of wooden stool for stalls.
